The Planters of the Commonwealth - Charles Edward Banks 1967
Scrupulous in every detail, this work contains the names of 3,600 passengers on the ninety-six ships which brought them to New England between 1620 and 1640. Working with the same records employed by Savage, Drake, and Hotten, and with records unknown or inaccessible to them, Col. Banks here pulls the several classes of records together to form the most complete and authoritative collection of passenger lists for the period ever published. In addition to the names of passengers and ships, places of origin, and places of residence in America, the book includes indexes to surnames, ships, English parishes, and New England towns.

Biological Diversity and Genetic Resources - Biological Diversity & Genetic Resources Project 1992
Conservation of biodiversity and the sustainable use of genetic resources have been priority issues for a number of countries and international organisations over the past decade. We have begun to realise that the rapid
rate of development at all costs has generated forces that are threatening to destroy the very substratum of life on Earth. Biological diversity is the building block of the myriad life forms on our planet and our defence against global climate changes. Wider acceptance of this truth has given an impetus to the need for further work at political and scientific levels. However, little information is available on how to study, use and conserve our biological and genetic resources. The Commonwealth Science Council's programme on biological diversity and genetic resources attempts to redress this imbalance. Launched in 1986, this programme recognises that good policies for conservation of our genetic resources require not only public investment by a systematic approach for institutionalising the key process of such conservation. The programme supports the development of appropriate courses, documents and training materials for capacity building at the local level. This book discusses the programme and aims to contribute significantly towards establishing relevant mechanisms and developing practical action plans for conserving and sustainably using our rapidly vanishing biological diversity.

Commonwealth - Ann Patchett 2016-09-13
The acclaimed, bestselling author—winner of the PEN/Faulkner Award and the Orange Prize—tells the enthralling story of how an unexpected romantic encounter irrevocably changes two families’ lives. One Sunday afternoon in Southern California, Bert Cousins shows up at Franny Keating’s christening party uninvited. Before evening falls, he has kissed Franny’s mother, Beverly—thus setting in motion the dissolution of their marriages and the joining of two families.

Spanning five decades, Commonwealth explores how this chance encounter reverberates through the lives of the four parents and six children involved. Spending summers together in Virginia, the Keating and Cousins children forge a lasting bond that is based on a shared disillusionment with their parents and the strange and genuine affection that grows up between them. When, in her twenties, Franny begins an affair with the legendary author Leon Posen and tells him about her family, the story of her siblings is no longer hers to control. Their childhood becomes the basis for his wildly successful book, ultimately forcing them to come to terms with their losses, their guilt, and the deeply loyal connection they feel for one another. Told with equal measures of humor and heartbreak, Commonwealth is a meditation on inspiration, interpretation, and the ownership of stories. It is a brilliant and tender tale of the far-reaching ties of love and responsibility that bind us together.
